

WEEK 7:

DEMO STORYTELLING + **MIDTERM REHEARSAL**

Turn your project into a believable pitch

Today's target

By the end of today, your team should have:

- **a draft midterm deck**
- **a clear demo story**
- **speaker roles and handoffs**
- **a backup demo plan**
- **updated docs / board / issue evidence**

Week 6 → Week 7 bridge

Last week you defined:

- one midterm-critical feature
- a Definition of Done
- a testing/checking plan
- where proof would be linked

This week you must turn that into:

- a believable demo
 - a believable story
 - a believable roadmap
- 

What the midterm is really testing

The midterm is not asking:

“Did you finish everything?”

The midterm is asking:

- Is the problem clear?
- Is the user clear?
- Is the core flow real?
- Can you prove progress?
- Is the roadmap realistic?

The demo story formula

Use this story spine:

- 1. Problem**
- 2. User**
- 3. Solution**
- 4. Main flow**
- 5. Proof**
- 6. Roadmap**
- 7. Ask**

A decorative graphic consisting of several overlapping, wavy, horizontal bands of varying shades of blue, ranging from a light sky blue to a deeper teal. These bands flow from the left side of the slide towards the right, creating a sense of movement and depth. They are positioned behind the text on the slide.

One-sentence team test

Fill this in:

“In our midterm, we will show how [user] uses [feature/flow] to solve [problem], and we will prove it is real by showing [demo + evidence].”

Activity:

Teams write and share this sentence before we move on to more slides.

Recommended midterm deck structure

Keep it simple:

1. Title / team / project
2. Problem
3. Target user
4. Solution overview
5. Main demo flow
6. What works now / proof
7. Roadmap to final
8. Team roles
9. Ask

What counts as proof?

Good proof includes:

- working demo link
- backup video
- issues
- PRs
- commits
- board snapshot
- screenshots
- CI/test evidence
- updated docs

Rule:

If it isn't linked, it didn't happen.

Demo reliability checklist

Before midterm, your team needs at least:

- one stable main flow
- a 3-bullet demo script
- a backup demo plan
- a driver for the demo
- a narrator who explains what the audience should notice

Speaker roles + handoffs

Minimum speaking plan:

- Speaker 1: opener, problem, user
- Speaker 2: solution overview
- Speaker 3: demo setup + demo
- Speaker 4: roadmap + ask
- Everyone: ready for Q&A support

Handoff rule:

Each speaker ends by naming the next speaker.

Studio work for today

In class, your team must create or update:

- midterm deck draft
- SPRINT_2.md
- board cleanup
- key issues with owners
- backup demo plan
- Week 7 Packet draft

Rehearsal rules

Round 1: 4-minute rough run

- 2 min story
- 1 min demo explanation
- 1 min roadmap + ask

Feedback only in these buckets:

- confusing
- too much
- not enough proof
- weak handoff
- unclear ask

Common mistakes

Avoid these:

- too many slides
 - too many features
 - weak or missing proof
 - no backup demo
 - unclear speaker order
 - vague roadmap
 - ending without an ask
- 

What to submit this week

A decorative graphic consisting of several overlapping, wavy, curved shapes in shades of light blue and white, flowing from the bottom left towards the center of the slide.

Week 7 Packet should include:

- demo link
- updated 3-bullet script
- backup demo plan
- midterm deck draft link
- story spine
- speaker order
- board snapshot
- docs update links
- risks/blockers
- individual contribution receipts

Exit ticket

Before you leave, your team must be able to answer:

1. What is your one main demo flow?
2. What is your weakest point right now?
3. What will you fix before Friday?
